Adventure with Alligators.

BY COL. WALTER P. DUNLAP.

After dinner, I carefully removed the skin from the body of my flamingo, and having cut it for drying, by drawing it in shape over a frame, I went out to see the fun. Some time before the dinner-table on the ten-service had been removed, we put Uncle Abner in mind of the story he promised to tell us.

"I told him that was it, and after he had had time to compose himself, and drink a moderate sized piece of tobacco in his cheek he commenced as follows—

"I've lived on this place a-going on to ten years. I came up here from New Orleans, and found this plantation goin' to rack and ruin, as far as possible. The man that owned it, thought more of his whiskey-bottle, than he did of his fields, and the consequence was, that his place was not only heavily mortgaged, but nearly the whole of his growing crops were sold in advance. None of the heaviest creditors wanted me to buy. While we were contending, both he and I died—and began. He left from his sight of water again. It was a point of the great bayou, and the current, as it rounded, and then struck across into a narrow opening towards the extreme point of the cape.

"I had come in to within a few yards of the shore, when I was stopped by a narrow strip of shallow, muddy water. It was not over five feet wide, and upon the opposite side, the grass grew tall and rank. I could leap it easily, and I gave the spring. I touched the ground beyond the sward—I touched a very soft spot. I was in the mud to my knees! I attempted to raise one foot—the other settled—I attempted to raise that one, and the first one settled. I was now in to the thighs! I had given up even the sward, and attempted to raise myself that way, but found no use. The more I struggled, the deeper I sank.

"Down—down—down, I went, until finally I had settled in up to my arm-pits! Oh! my Heaven! You never can form any idea of how I felt at that moment. That I should ever get out of that mud appeared impossible. I dared to move my feet no more. I could feel that there was yet a solid bottom, but I knew that of course my arms helped hold me up, but they would not do so if I should draw my feet down by attempting to draw one of my feet out. I thought of my dog. Could I not pull him to me? Could I not swim with him, and immediately tried to draw me out by seizing my frock in his mouth; but his own feet sank in, and the rolling over was a task. I attempt succeeded in getting him to me, and the instinct of the poor animal was such in endeavoring to save himself, that he worked himself entirely behind me, and then started directly up the bank. I say then, for I was certain—They were afraid of me, and I wondered if they wouldn't think I was afraid of them. One of the fellows that had started up the bank—a very large one, certainly eight feet long—was coming towards me without any hesitation. I had reloaded my rifle, and with a quick aim I shattered his left eye. He fell back, and the other two quickly followed him.

"I had frightened the alligators for the moment, but I knew enough of their habits to know that the sweet-scented sweet-meat was all I had to depend upon, and I thought I had better be moving out of that. I withdrew a short distance and reloaded my rifle, and then started on. My intention was to go back by the same way I had come, but I missed it, and came out in another place. Yet I knew my course—or, I supposed I did—and kept on. Finally I came to a point of water again. It was a point of the great bayou, and the current, as it rounded, and then struck across into a narrow opening towards the extreme point of the cape.

"I had come in to within a few yards of the shore, when I was stopped by a narrow strip of shallow, muddy water. It was not over five feet wide, and upon the opposite side, the grass grew tall and rank. I could leap it easily, and I gave the spring. I touched the grass—I touched
